BUSES International
702 N. Ridge Rd. East
Lorain, OH 44055

To Whom It May Concern:

It has been a wonderful experience these past three years working with BUSES International. From the beginning of the planning stages to the completion of our mobile medical unit, BUSES International walked us through the entire planning process from what we wanted, what the purpose of the vehicle was to be, to everything with which we needed to equip the bus in order to achieve our goal. They were courteous, available, and continue to remain available, partnering in prayer with us as well. Our mobile medical unit was built in an appropriate time frame and presently contains everything we requested to provide medical, dental, and optical care in any disaster. Our mobile unit was built with the best materials and brand new appliances, presented clean and attractive. They drove it to us from Ohio to Los Angeles, California, and spent an entire week on site, training us in how to set up the bus's extensions and how to use the built-in devices. As a result of providing us with such an efficient, up-to-date mobile unit, we have received - and presently continue to receive - many requests throughout the city and other nations and were awarded a missions spirit award for our services that we provide.

I want to thank BUSES International for creating this unit, which will be and has been instrumental in bringing relief to the suffering and needy. We highly recommend BUSES International to any organization that is considering such a project.

Sincerely,

Louie Rosado
